# SEANERGY Project – Horizon Europe Energy

ENNSHAFEN

CONNECT  
SUPPLY  
UNITE

- Master Plan – a main outcome of the project
  - outlines a transformative strategy to support European ports – both seaports and inland ports – towards sustainability and green energy utilization
  - structured into 3 primary phases, each designed to progressively guide ports from initial vision setting and strategic planning to implementation and continuous improvement
  - a comprehensive approach that incorporates customized solutions, acknowledging the unique characteristics and needs of various ports
  - goal is to foster a sustainable transformation that not only aligns with environmental and technological advancements but also promotes enhanced stakeholder engagement and the standardisation of best practices across ports
  - Phase 1: establishing a high-level vision / Phase 2: plan development with detailed strategy formulation / Phase 3: emphasizes review and implementation
