

The Republic of Serbia

Project „Green Ports“ Port Governance Agency

Why „Green Ports“?

Second country in the Danube region by cargo volume

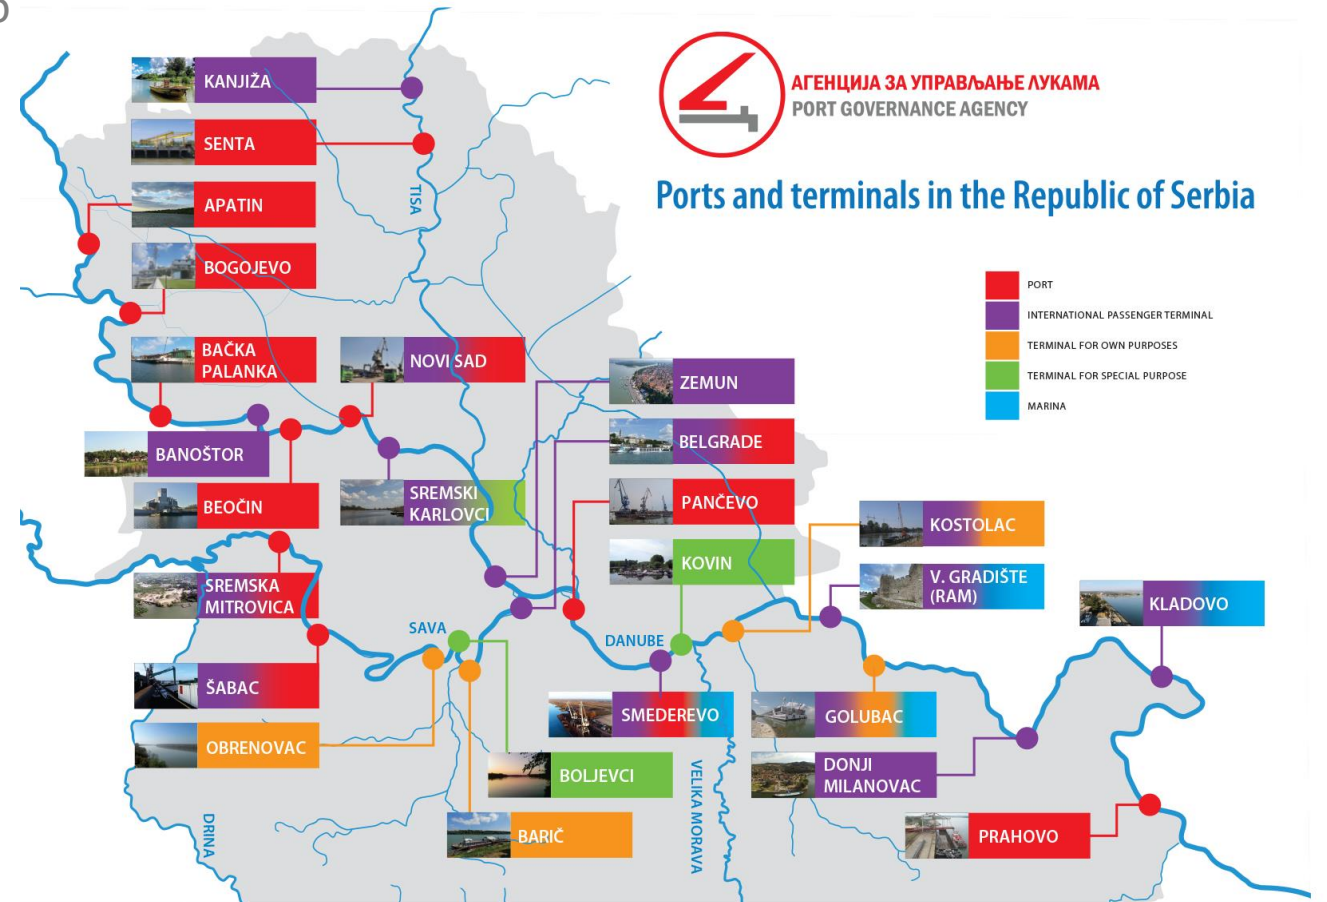

Third country in the Danube region by the number of cruise passengers

1,000 kilometers of navigable waterways

Frequent passenger and cargo traffic on Serbia's rivers

Project Segments

Monitoring system (Measuring stations)

- Timely response in case of accident
- Collecting data on weather conditions
- Providing data on navigable conditions to all participants in IWT
- Exchange of data among public institutions

On-Shore Power Supply

- Supporting the „Zero Emission“
- Powerlock System
- Selected locations: International passenger terminals
- The Republic of Serbia - the first country in this part of Europe with on-shore power supply

Solar energy

- Introduction of solar energy in ports and passenger terminals
- Reducing carbon footprint
- Decreasing the pressure on the electric power system
