***Inland navigation is an environmental champion.***

*The waterway must be served by green ports. That means, when calling at our green Danube ports, our clients can use **shore power facilities**, which fit well within the philosophy of our green logistics concept.*

# Digital co-operation of the Danube-Main-Rhine region

*The Sail Fast, Then Wait (SFTW) practice involves ships rushing to their destination, only to wait at anchor for berth availability, causing unnecessary fuel use and emissions. The Blue Visby Solution (BVS) helps ships avoid unnecessary anchorage time by adjusting sailing speeds to align with berth availability, thereby cutting fuel usage and emissions." as a digital platform that employs advanced algorithms and real-time data to coordinate the arrival of numerous ships at a single port, allowing each ship to adjust its sailing speed to prevent early arrival and subsequent waiting at anchor. A cost-saving mechanism shares the reduced emissions benefits and fuel savings among ship operators, charterers, and port authorities. (Idea IMO)*

# www.hfip.hu

The screenshot shows a web browser window displaying the website <https://test.ilovewp.net/hfip/>. The browser's address bar shows the URL and a security warning. The website's header includes the logo of the Hungarian Federation of Danube Fishermen (HFIP) and a navigation menu with items: KEZDŐLAP, HÍREK, HFIP, TAGOK, KÁSZ, PARTNEREINK, PROJEKTEK, RENDEZVÉNYEK, GALÉRIA, KAPCSOLAT, and EN. The main content area features a map of Hungary with the Danube river highlighted. Blue anchor icons are placed at various points along the river, including locations like Győr, Komárom, Budapest, and Szekesfehervar. The map also shows major roads, cities, and national parks. The browser's taskbar at the bottom displays various application icons and the system clock showing 15:37 on 2018.05.07.
