

The full spectrum of transport & mobility

Integrative solutions for complex engineering projects

iC the future · iC the people · iC the change

Strong engineering skills, smart technologies and a clear understanding of mobility requirements are the basis for a efficient transport infrastructure and reliable services. Our experts bring innovation and sustainability together.

- ✓ **Applications for project financing**
- ✓ **Studies on feasibility, economic efficiency and environmental compatibility**
- ✓ **Detailed and preliminary design, planning, cost estimates, technical concepts and specifications**
- ✓ **Procurement support, tender documents, evaluation according to national and international guidelines**
- ✓ **Contract management, technical assistance and contract administration**
- ✓ **Transport masterplans and corridor studies**
- ✓ **Site supervision according to national and international guidelines (FIDIC, EU PRAG etc.)**
- ✓ **Intelligent transport infrastructure (ITS) and road tolling**

Schönbrunner Strasse 297, 1120 Vienna, Austria
